Introduction

About the System

Welcome to PSA Error Collection System!

What is the PSA Error Collection System?

Key Features

About The System

Welcome to PSA Error Collection System!

In the Philippine Statistics Authority, it is standard for new employee users to be issued this manual to learn about the many features and functionalities of this innovative system! This user manual will show you how to properly operate the PSA Error Collection System and how to maximize the efficiency of this system!

What is the PSA Error Collection System?

The Philippine Statistics Authority is the main curator and database for all kinds of personal and legal documents for the Filipino citizen. And along the way, many errors and misaligned information may appear on curated documents ranging from misspellings, inconsistent dates, and information that is not properly updated. These issues, no matter how scarce they may be, have served as issues for the Filipino citizen as well as for the compilation and storage of documents by the PSA. Which is why the PSA

Audit Logs

Audit Log Interface

The Audit log tracks every error corrections that is implemented in the records. Each log crucially contains the **original** and the **new value**, updated in a **given period**. With a purpose of transparency, now the admin and employees alike can interpret the performed corrections.

The interface has the audit log table as a primary widget, then search bar.

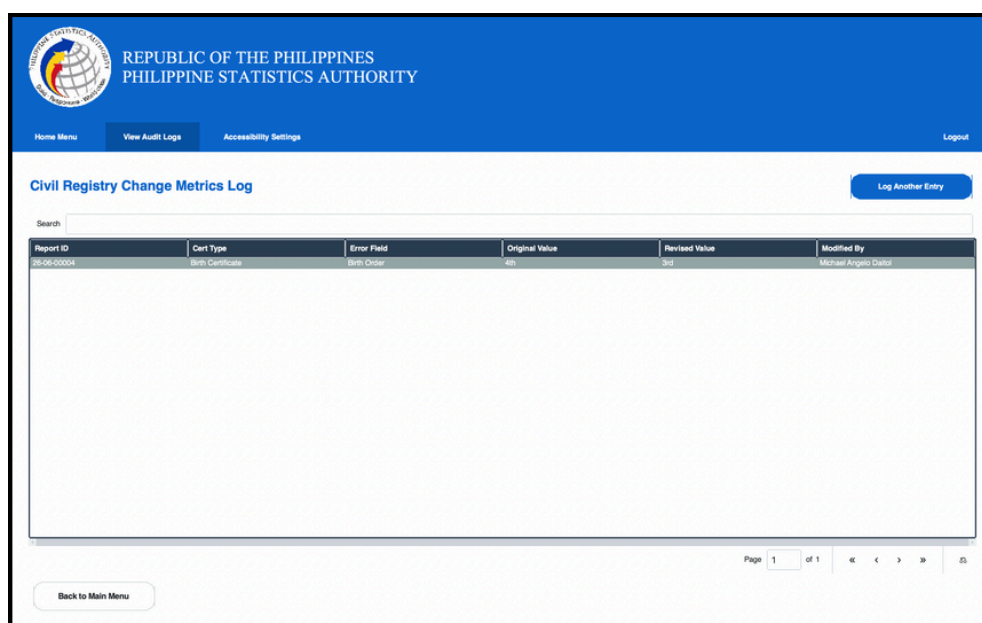

fig. 4 Audit Logs for Entry Checking

Searching a Field

This window offers a search bar for a specific field/s desired.

Just **click at the search bar** above the table and input the values intended to be searched. Fields that matched the searched input will be automatically displayed, while hiding the records that do not match.

New Entry

Creating a New Entry

To create a new Entry, click the **+ New Entry** button located on the Home page. Then select the type of certificate to report using the dropdown menu.

Certificate Types:

- Birth Certificate
- Death Certificate
- Marriage Certificate

Each new entry will record the **registry number**, the name of **name** of the certificate owner, then the **error field**, **erroneous value**, **new value**, and **explanation for the change**. The options for **select an error** vary depending on the type of certificate reported.

1. Enter the required details.
2. Click **Confirm** to save, or click **cancel** to exit New Entry page without saving.

The header includes the PSA logo and the text 'REPUBLIC OF THE PHILIPPINES PHILIPPINE STATISTICS AUTHORITY'. A navigation bar contains links: 'Home Menu', 'View Audit Logs', 'Employee Logs', 'Create Account' (highlighted), 'Requests', 'Accessibility Settings', and 'Logout'. The form itself is titled 'Register New Account' and contains four input fields: 'Enter Username', 'Enter Email Address', 'Enter Password', and 'Confirm Password'. Below these fields is a blue 'Register Account' button and a smaller 'Back to Dashboard' link.

fig. 1 log in page

Additional Features

Manage Request Queue

Pending Token Request Queue

In this tab, it shows the requests from employees who wants to change their password. This is where the 6-digit OTP can be found to validate or to allow and keep track of the employees request.

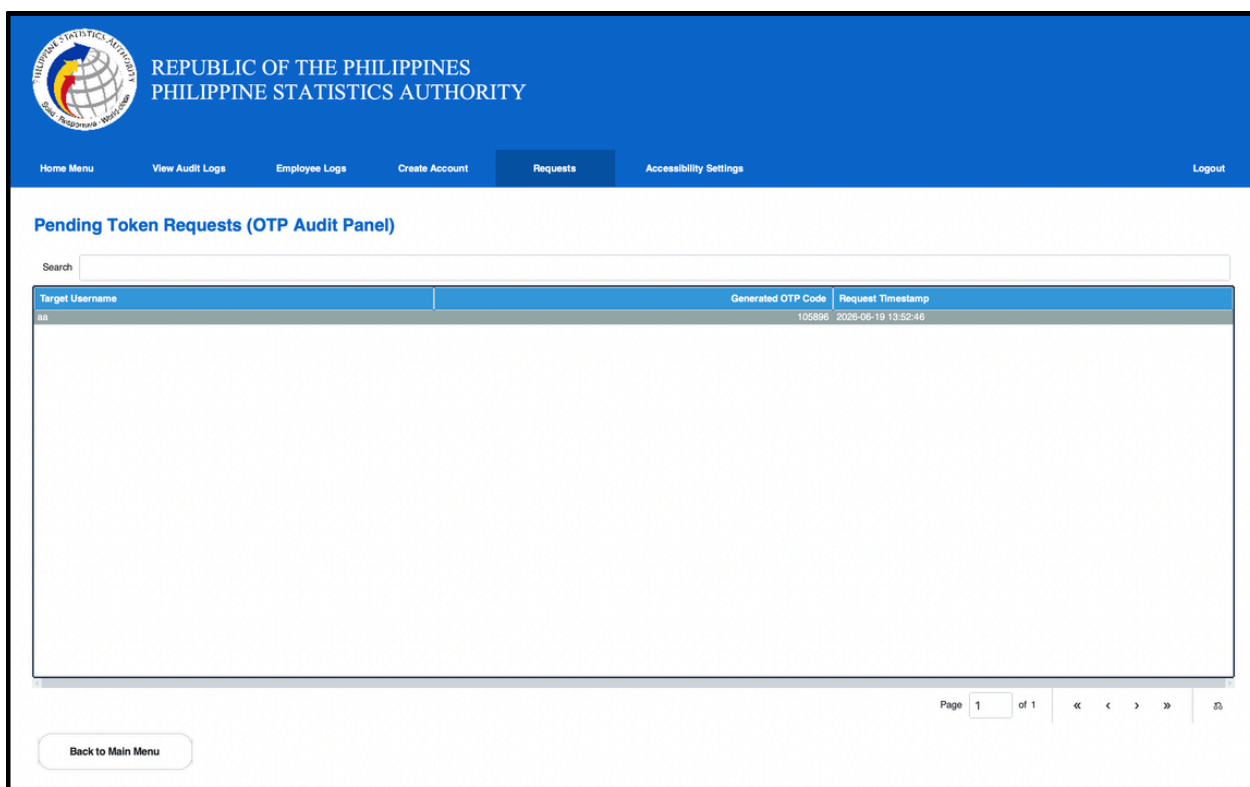

fig 7.1 Pending OTP Token Request Panel

Manage Request Queue

Security Audit Log

This Feature in the Administration Logs presents any changes in the created accounts, in particular, it keeps tracks of modifications done to employee accounts to bookmark any possible anomalies or erratic changes that may be investigated later on. It mainly keeps track of password changes in case of foul play done to user end accounts.
